Re: Sprint Nextel's Status Report on 800 MHz Band Reconfiguration

WT Docket 02-55

Dear Mr. Furth:

Sprint Nextel Corporation ("Sprint Nextel") hereby files the attached report regarding the 800 MHz band reconfiguration progress with the Federal Communications Commission ("Commission") and the 800 MHz Transition Administrator, LLC ("TA"). In its September 12, 2007 *Third Memorandum Opinion and Order* in the above-captioned proceeding, the Commission required Sprint Nextel to submit monthly reports regarding its clearing of Channels 1-120. *See Improving Public Safety Communications in the 800 MHz Band*, Third Memorandum Opinion and Order, WT Docket No. 02-55, at ¶¶ 29-30 (rel. Sep. 12, 2007) ("*Third Memorandum Opinion and Order*"). ¹

As demonstrated in this report, the substantial progress in 800 MHz band reconfiguration noted in Sprint Nextel's previous monthly reports has continued. In the past month, Sprint Nextel has completed the retuning of all non-Sprint Nextel, non-SouthernLinc Channel 1-120 incumbent licensees in one additional NPSPAC region (Missouri), raising the number of completed Phase I NPSPAC regions to thirty-eight. In the eighteen remaining NPSPAC regions or U.S. Territories in which Channel 1-120 clearing has not been fully completed, fifteen have three or fewer 1-120 Channel licensees remaining to be retuned. *Overall, ninety-five percent of the nearly 1200 Channel 1-120 licensees that must be retuned during Phase I of 800 MHz band reconfiguration have been retuned*.

Recent filings by the 800 MHz Transition Administrator ("TA")² and this report also demonstrate a steady increase in the number of public safety licensees that have signed Frequency Retuning Agreements ("FRAs") and have established dates to initiate their Phase II infrastructure retunes. As of today, public safety licensees and Sprint Nextel have signed nearly

By continuing to file these reports in compliance with this reporting requirement, Sprint Nextel does not waive its right to challenge those requirements or any other portion of the *Third Memorandum Opinion and Order*.

² 800 MHz Transition Administrator, LLC, Quarterly Progress Report for the Quarter Ended September 30, 2007, filed November 20, 2007 in WT Docket 02-55.

David Furth, Associate Bureau Chief December 3, 2007 Page 2

500 FRAs. We have also reached over 400 Planning Funding Agreements ("PFAs"). Aided by nearly twenty 800 MHz TA-sponsored Regional Planning meetings to date, sixty-four Phase II NPSPAC licensees have established a date certain with Sprint Nextel for completing their retunes. This number should continue to grow steadily, as Sprint Nextel and additional public safety NPSPAC licensees continue to finalize infrastructure retune dates, typically as a result of the TA Regional Planning meetings. Finally, over seventy licensees, including both NPSPAC and Expansion Band public safety licensees have fully retuned to their new channel assignments.

At the same time, we are including in this report a number of concerns regarding efforts to facilitate completion of Phase I and Phase II of 800 MHz band reconfiguration. While ninety-five percent of all Phase I retunes are complete, as noted above, Figure 1 demonstrates that fifty-eight Phase I non-border licensees have not completed their Phase I retunes. While some will be completed by the end of December, we believe that most of these licensees will not complete their retunes by the Commission's December 26, 2007 Phase I retuning deadline. These delayed retunes may in turn prevent corresponding Phase II licensees from initiating their own retunes. We provide below additional details on this group of licensees.

- <u>Missed Contract Dates.</u> Twelve licensees did not complete their retunes within the time periods specified in their respective FRA and half of them are now more than 120 days past their retune deadlines. Four of the twelve licensees are the last remaining 1-120 incumbent licensees left to retune in their respective regions.
- No FRAs. Twenty-three licensees have not yet signed ("FRAs"). Of them, seven are public safety agencies that are continuing to conduct planning pursuant to Planning Funding Agreements; accordingly, they have not provided retuning cost estimates and work plans to Sprint Nextel from which to negotiate FRAs. In addition, four other Phase I licensees have issues that are the subject of administrative proceedings either before the Bureau or the Commission's Administrative Law Judges. Most of the remaining unsigned licensees are negotiating FRAs with Sprint Nextel.
- Other Issues. With few exceptions the remaining licensees fall into one of the following categories: those that are planning and/or implementing their Phase I retune as part of the their Phase II retunes (such as Fairfax County, Virginia); those with retunes in progress and that are contractually required to complete their retunes prior to December 26, 2007 (such as Montgomery County, Maryland); those with retunes in progress that are not contractually required to complete their retunes until after December 26, 2007, but may do so by the end of 2007 or mid-January 2008 (such as the State of Florida).

Upon request, Sprint Nextel would be pleased to provide the specific details regarding the retuning progress of any of the above-referenced Phase I licensees. With this information, the Bureau can take appropriate action prior to the Commission's December 26, 2007 Phase I deadline.

Sprint Nextel observes that the Bureau has recently taken a series of actions that may be hindering Phase II completion. In the past month, the Bureau appears to have granted over 100 waivers of the Commission's Wave 1 and Wave 2 planning deadlines. These waiver requests

David Furth, Associate Bureau Chief December 3, 2007 Page 3

have neither been filed in the 800 MHz rulemaking docket nor otherwise made publicly available.

Since we have not seen the majority of the waiver requests, Sprint Nextel takes no position at this time on the propriety of the Bureau's grants. We note, however, that the sheer number of planning completion deadline waivers requested by public safety licensees suggests that many may not be ready to timely initiate FRA negotiations, execute FRAs and complete their retunes within the Commission's current timeline. In that regard, the Bureau's waiver requirement for planning completion deadlines appears to be causing licensees to divert their resources to preparing waiver requests and away from doing the planning needed to finish band reconfiguration.³ This, too, has ramifications for the time necessary to complete 800 MHz reconfiguration.⁴

Sprint Nextel remains committed to completing 800 MHz band reconfiguration and submits that by any objective measure substantial progress continues to occur. Sprint Nextel looks forward to providing its next update to the Bureau after the Commission's December 26, 2007 Phase I deadline.

Should you have any further questions in this matter, please contact the undersigned.

Respectfully submitted

/s/

Lawrence R. Krevor Vice President – Spectrum

James B. Goldstein Director, Spectrum Reconfiguration

cc: 800 MHz Transition Administrator

_

See e.g., FCC REBANDING ORDER CREATES MAJOR HEADACHES, by Glenn Bischoff, Mobile Radio Technology Magazine (November 14, 2007), available at: http://mrtmag.com/rebanding/news/fcc rebanding order 111407/ ("Andy Maxymillian, senior consultant for Blue Wing Services who also represents 800 MHz licensees, said the new deadlines set by the FCC's September order effectively stopped rebanding work for his clients. "The reaction from the clients that we're working with has not been to accelerate the work that they're doing. In fact, in a lot of cases, it has been just the opposite," he said. "The Oct. 15 deadline was the big example, where licensees were required to complete planning by [that date]. In almost every case in our client base, there wasn't an acceleration to speed up to meet that date, there was a pause ... to write up requests for extensions or waivers.")

Notwithstanding these concerns, Sprint Nextel will continue to make Channels 1—120 available to public safety licensees to retune their channel infrastructure within 60 days notice, as described in the Transition Administrator's November 30, 2007 Press Release and the *Third Memorandum Opinion and Order*.

In Sprint Nextel's November 1, 2007 report, Sprint Nextel reported that it had reached agreement with the Port Authority of New York – New Jersey ("Port Authority") regarding the date when Sprint Nextel would make its 1-120 channels available for the Port Authority to initiate its retune. Port Authority has been temporarily removed from this listing of agreed upon retune dates, as the parties continue to finalize the FRA.

Licensee transactions may cross multiple regions, e.g. Saint Clair County Transit is in Illinois and Missouri, and Baptist Memorial Health Care is in Mississippi and Tennessee.
